

"Memories are a way of holding onto the things you love, the things you are, and the things you never want to lose."

Volume5, Issue 1

Newsletter Date 5-13-2010

Making the most of Technology

In today's world of Technology, Media sharing platforms are extremely popular, user-friendly, and highly accessible. They include things like mobile devices such as cell phones, PDAs, computers, and home game consoles such as the PlayStation 3 and Xbox 360. These devices are making it easier to view and share your special memories from just about any room in your house.

Another popular Technology to share your memories is Social Networks. These Networks make it easy to keep in touch with family and friends which is driving the growth of social networking. People of all ages find it fun and rewarding to be able to share special memories with those whom may not otherwise be able to see these memories.

Convert your old photos and videos to share at home or online.

We can take your photos and videos and transfer them to a Digital file format. Converting to a Digital file format allows you to play the converted video files directly on your Media Sharing platforms. These Digital formats also allow you to edit and post memories on your favorite Social Networking sites like Facebook or YouTube with little to no additional software needed

How can TB-Lion Media Presentations help?

Let us help bring your special memories back to life, so your memories can be shared in today's world of Technology of Media Sharing Platforms and Social Networking Sites.
