

*"Memories are a way of holding onto the things you love, the things you are, and the things you never want to lose."*

Volume2, Issue 1

Newsletter Date 2-3-2010

## Which Memories would you save?

When disasters strike like Hurricanes, Tornados, Fires, Floods, and Earthquakes they drive home the point that any of us may have to evacuate our homes in a moment's notice.

With only minutes to pack up and leave, what do you take? Do you forsake those photo albums and videotapes of your WEDDING, trips to DISNEYWORLD or even pictures of the KIDS? How can you make a choice as to which memories to leave behind?

Well, thankfully, we live in the digital age. And with that, comes the ability to take photographs, slides, and home movies and digitize them onto DVD's or Flash drives and place them in arms reach. That way, if you would have to get out of your house fast, all you would need to do is grab a DVD case or Flash drive filled with your digital memories.

## A Daunting Task?

Digitizing a lifetime of memories can be a daunting task. The average household may have hundreds or thousands of photographs and video tapes stored in boxes. It can take weeks, months, maybe even years to completely digitize your memories.

## How can TB-Lion Media Presentations help?

We have good news for you! We can take on this task by:

- Scanning and digitizing all your photos or 35mm slides
- Converting video cassette tapes to a digital format
- Saving you time and energy!

Better to make the commitment now than to take a chance and lose your special memories forever.
